Spring Has Sprung!

Tip Toe Through the Tulips

Our award-winning tulips are on display at [Kessler's Diamonds](#)' downtown Milwaukee location. Everyone loves them! Want a bunch to brighten up your space? [Click here](#) for details.

Who Let the Birds In? Hoot? Hoot?

Check out these colorful birdhouses that we created for a seasonal window display for one of our clients. Interested in having some nest in your location? [Click here](#).

Shady Ladies, Mannequins Remake

Whenever we can, we like to reuse and upcycle materials when creating display pieces. That's just what we're doing for two window displays at [Bayshore](#) an open-air, mixed-use shopping center with offices and multi-family residential units in Glendale, Wisconsin.

Inside our display studio, our team magically transformed old, discarded lampshades into a set of razzle dazzle props!

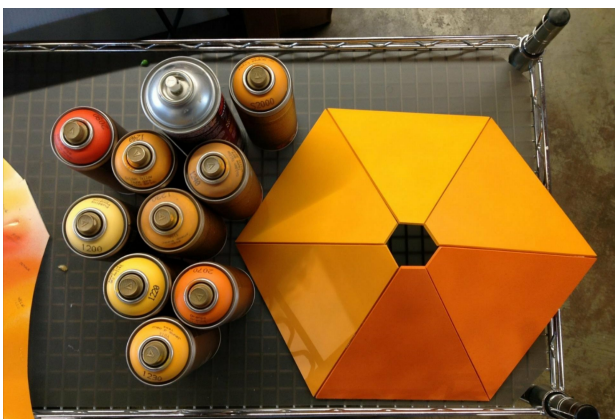

We also painted some mannequins, and then adorned them with cool dresses made out of newspapers! This certainly gives new meaning to the term paper dolls!

Voila! These colorful ladies are now on display and garnering a lot of attention!

What's up Doc?

Here's a sneak preview of some props that we are in the midst of creating. Can you guess what they are?

Spring is Bustin' Out All Over!

Our spring runway is full of fantastic floral fashions that are made to last! Here's just a few of them...

We even created the one shown below for the kitchen in our office. It's another example of upcycling!

Our super creative display artists would love to design a seasonal display for you. Right Amy?

Simply email us: solutions@retailworksinc.com. We've got tons of ideas blooming!
